FENCING  
CLEANING & CARE INSTRUCTIONS**

## Fortress Powder Coat Cleaning and Care Instructions

- After installation of your Fortress Fencing Product, all exposed surfaces should be cleaned with a soft cloth or sponge using a solution of warm water and non-abrasive, pH neutral detergent. Surfaces should be thoroughly rinsed after cleaning to remove all residues. Examples of acceptable solution: Simple Green®, dish soap and warm water.
- After installation is complete, ensure construction materials such as concrete, plaster, and paint splashes are removed immediately before they have a chance to dry. Failure to remove these materials may cause damage to the powder coated surfaces.
- Fortress recommends cleaning in three to four monthly intervals all products and powder-coated surfaces. In areas where higher traffic, increased atmospheric substances, or other effects may occur, the time period between cleanings should be increased to monthly intervals.
- **WARNING:** Do not use strong solvents such as thinners, or solutions containing chlorinated hydrocarbons, esters, or ketones. Abrasive cleaners or cutting compounds should not be used.
